YOHANNES LEMALIGN

Architecture Student & Graphic Designer

ABOUT ME

I am an undergraduate architecture student at Adama Science and Technology University (A.S.T.U.). I see every project as a personal challenge to grow and improve. Currently, I am seeking an internship at a reputable architecture firm where I can collaborate with experienced professionals and contribute to impactful architectural work with a vision for the future.

Mixed - Use Building

Types :
Mixed use building

Location :
Ethiopia, Adama

Building Area :
2035 sqm, 8 floor

Project Year :
2024

This project involves the architectural with interior design, electrical and sanitary design of a mixed-use building , providing a functional and aesthetic solution to urban development needs. The building incorporates a combination of commercial and residential spaces, efficiently utilizing land and resources to cater to diverse user needs.

01

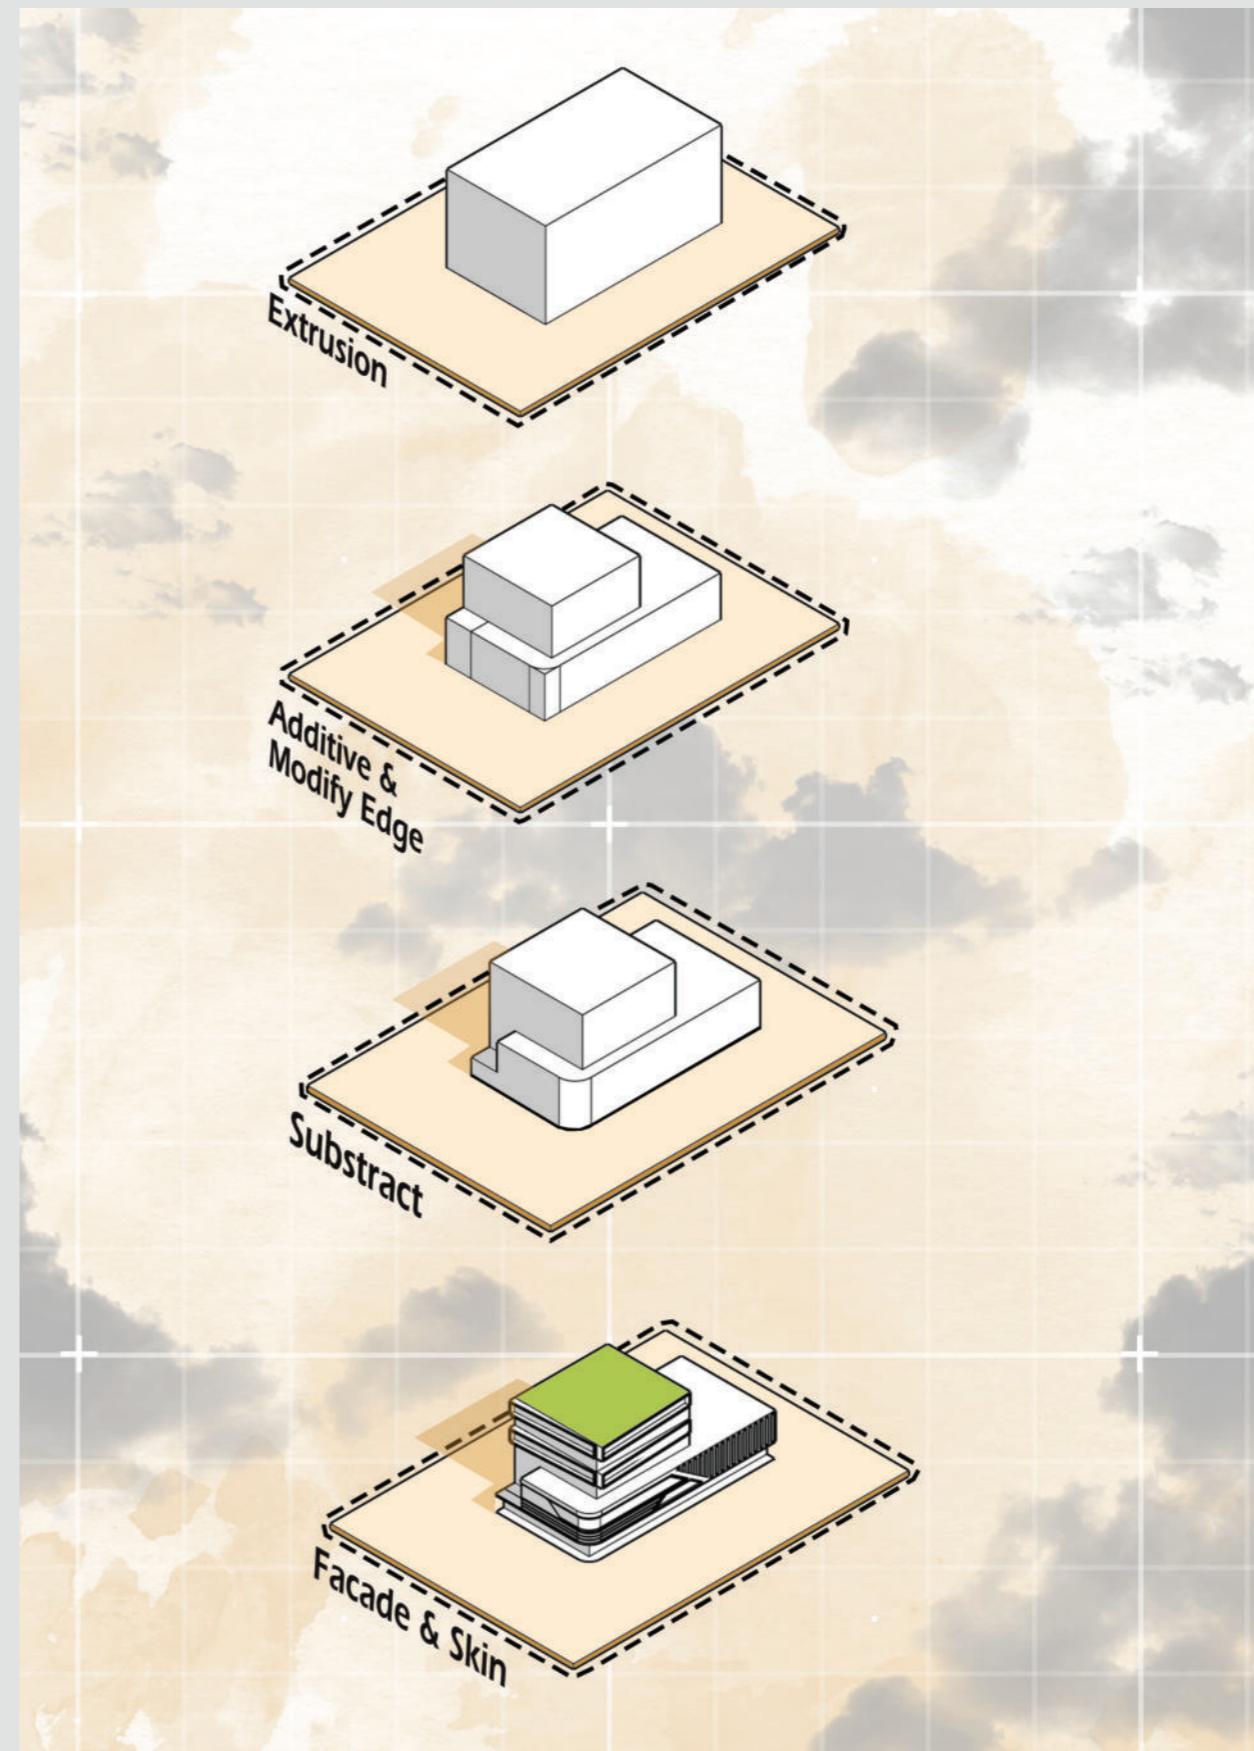

Concept Development

Integration

Integration means the act of combining different parts of elements to a unified whole. First perception of the project was inspired from mixed-use building.

The mixed-use refers to the integration of different types of uses such as residential, commercial & office space within a single building or development.

Urban Planning

Location :
Ethiopia, Adama

Total Area :
36.7 hectares

Project Year :
2024

The new replacement site has been selected at a distance of 2 kilometers away and it is found at the northeastern direction of the existing site. The nearby sites of the site have been occupied already with residential and other purposes, and it is problematic to put them around even if it is nearer. The reasons are the uncomfortable topography and the threat of the Kitto River in summer times.

02

Landscaping

In the center of the site there is plaza with their landscaping
In pedestrian and asphalt road there are many greenery is exist
A landscape design is applied in social space with greenery
in front of the building and in the compound lay out

Project Year :

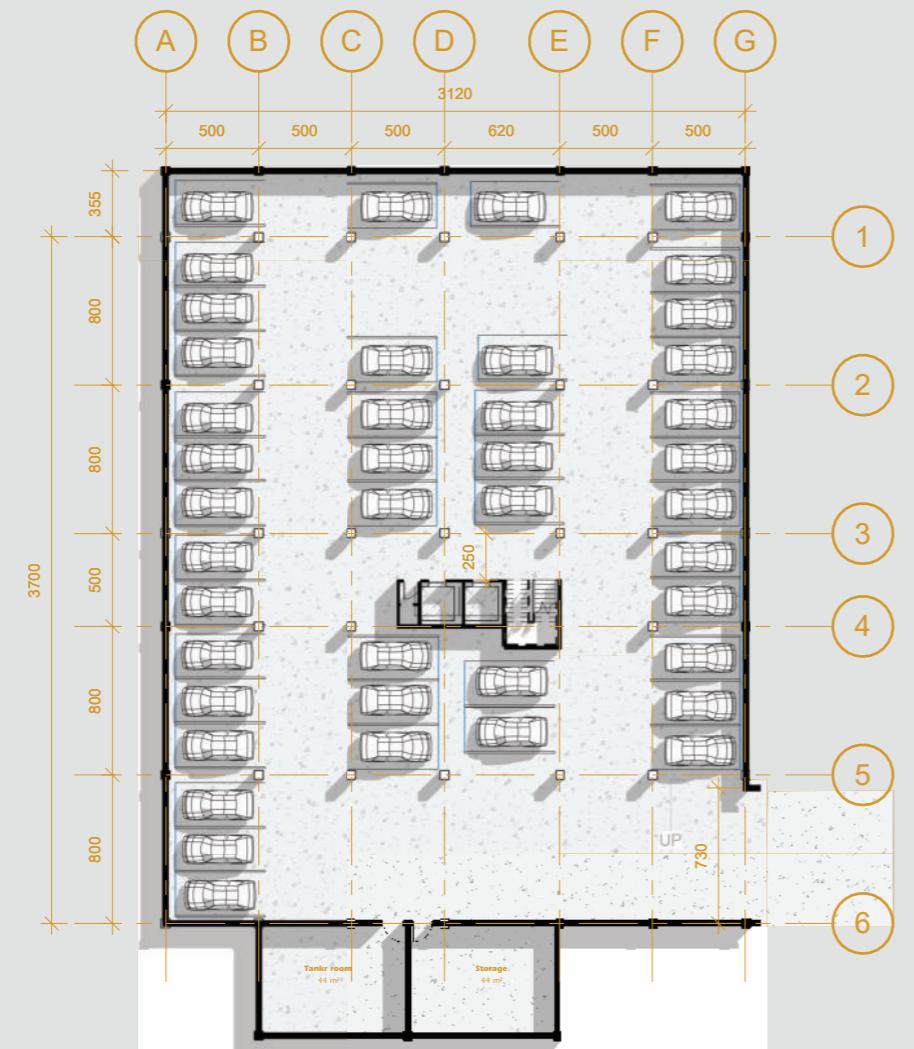

2023

Retail on the lower Floor: It's super common to have shops, cafes, or restaurants on the lower floor of an apartment building. Residential on the Above floor This keeps the residential spaces quieter and more peaceful, away from the hustle and bustle of the retail area. Recreational Spaces These can be on any floor Think gyms, and maybe even rooftop gardens. These spaces add to the quality of life in the building.

Total Area :
1120 sqm

Project Year :
2024

The court has a total of 12 courtrooms, distributed across the different floors. Specific details regarding the exact number of courtrooms on each floor may vary, but typically. The courthouse features neoclassical elements, characterized by grand columns and a symmetrical façade. The interior includes multiple courtrooms, administrative offices, and public waiting areas designed for accessibility and functionality.
